EXPERIENCE

Angular Developer | Technical Bazaar

Sept'2023 - Present

Role and Responsibilities:

Frontend Development:

- Designed and maintained responsive websites using HTML, CSS, Bootstrap, and JavaScript.
- Enhanced projects with Angular, adding new features and improving user interfaces.
- Built multi-domain, multi-theme frontend logic.

Backend Development & API Integration:

- Built and deployed APIs with Node.js and Express.js on Windows Server.
- Integrated RESTful APIs for efficient CRUD operations.

Deployment & Domain Management:

- Managed domains via Namecheap and GoDaddy, configured DNS with Cloudflare, and deployed sites on Windows Server and cPanel.

Collaboration:

- Worked closely with designers and backend developers to implement features, resolve issues, align logic with UI and business requirements.

PROJECTS

• Moonandstars - Fashion show website

May'2026

Technologies used: Angular, Typescript, REST APIs, Node.js, MySql, Razorpay

- Integrated Razorpay payment gateway for online registrations.
- Managed MySQL database for registrations and payment records.
- Implemented payment verification and transaction processing.

• AFFWL – Blog Frontend Development (Multi-domain & Multi-theme)
